Interpreting Services

At City Legal Translations we understand the importance of using impartial, professional, expert interpreters and, with over 35 years' experience, you can rely on us to get it right, every time.

Our interpreters are experts not only in the spoken word but also with the cultural expressions and etiquette. Our clients' needs are our priority and as such our interpreters are handpicked according to their individual skills and experience - spoken language, subject matter, country knowledge and location.

So what is interpreting? Interpreting is the art of orally translating the spoken word between (usually) two languages and must be carried out in a completely accurate and non-biased manner. We provide interpreters for courts, business meetings, to assist with witness statements, immigration matters and for conferences. We can provide interpreters on the National Register of Public Service Interpreters (NRPSI) upon request and can also offer interpreters at Legal Aid rates, where appropriate.

We can offer all types of interpreting, including:

- Simultaneous interpreting
- Whispered interpreting
- Ad-Hoc interpreting
- Consecutive interpreting
- Telephone interpreting
- Remote video interpreting

We can also provide assistance with interpreting equipment, should it be required.

Frequently asked questions

Here's some questions and answers that may help you understand more about City Legal's translation services.

How do translation companies price their services?

Some companies charge by time, some by line, page or number of words. At City Legal Translations, the pricing structure is per thousand words.

Does the cost of translation vary from language to language?

Yes, because of the availability of good quality translators. Countries where there are low levels of population such as Iceland are usually expensive. While countries where the cost of living is high, such as those in Scandinavia, generally cost more. Japanese translations are also pretty expensive too.

Is it necessary to use a specialised translation company?

Legal translation is highly technical, requiring a specialist familiar with the subject matter and terminology. To ensure you receive an accurate service that you can trust, it is vital that you use a specialist translation company.

How do you ensure that my sensitive documents will be kept safe?

You can trust us with the most confidential material. Our professional team of linguists are aware of the need for client confidentiality at all times and they are committed to ensuring the safety and confidentiality of any documents or information shared throughout the translation process.

My client requires their documents to be translated into numerous different languages, how many combinations do you offer?

We work with more than 2000 translation experts and support over 600 language combinations.

How can I be assured of translation quality?

City Legal is an accredited agency and is a member of the Association of Translation Companies (the governing body for translation in the UK).

We are also happy to provide translation samples of up to 300 words. We'd recommend that you run these samples past a trusted, language-sensitive native speaker for a second opinion.

You'll get best results from developing an on-going relationship with a translation company. The longer you work with them, the better they will understand your requirements.
